MEMORANDUM FOR THE RECORD

SUBJECT: Director's Concern over Handling of Cuban Material

1. At the morning briefing on 15 November the Director expressed concern over whether the philosophy of our Current Intelligence analysts and estimators was such that they considered material only from NPIC or SIGINT. He said that he thought we should get into this.

2. He also expressed concern over the ground rules on publication of material in the Central Intelligence Bulletin, and said that he thought material should not be delayed even for one day; he noted that there always could be a footnote that coordination was refused.
